

GEOGEBRA WORKSHOP

February 18th from 7 to 8pm in Pearce 404

Professor Marcinek will be holding a workshop for us to teach us how to use GeoGebra! Whether this is your first time using GeoGebra or have used it for years, there will be something for everyone to learn. The focus of the workshop is exploring how geometry and algebra interact. We will discuss conic sections and see why geometric definitions produce the same curves as cutting a cone. We hope you can all make it!!

We will be having this meeting in room **404** in order to use the computers in the labs. If you would like to bring your own laptop you can, but it is not necessary. If you're using your own device, make sure that you can run GeoGebra Classic 5.
