Kappa Mu Epsilon - Math Club
Presents:

Hexaflexagons

Tuesday, 10/23, at 6:30 PM

Pearce 124

Join KME as we learn to make hexaflexagons! Hexaflexagons are simple paper polygons with fascinating properties. They can be "flexed" to uncover new faces and hide the old.

Participants will be taught how to make hexaflexagons as well as be given challenges to discover some of their puzzling properties

All are welcome to join us!
