

Kappa Mu Epsilon Mathematics Honor Society

Join KME for “Proofs Without Words” with Dr. Narayan

“Proofs without words” are not formal proofs. Speaking of what it takes to be a mathematician, Paul Halmos stated, “To be a scholar of mathematics you must have the ability to visualize.” Proofs without words generally are pictures or diagrams that help to see why a particular statement may be true, and also to see how one might begin to go about proving it true. Most of these proofs without words are taken from MAA journals.

Tuesday, November 7

@ 6:30, Pearce 227
